

*Mark your calendars!*

**OCTOBER 19, 2012**

**JENNIFER REXFORD**

Professor, Department  
of Computer Science,  
Princeton University

*Frenetic: A Programming  
Language for Software  
Defined Networks*

**FEBRUARY 27, 2013**

**DILMA DA SILVA**

Principal Engineer and  
Manager, Qualcomm  
Research

*System Software for  
Cloud Computing*

**APRIL 22, 2013**

**ANNIE I. ANTON**

Professor and Department  
Chair, School of Interactive  
Computing, Georgia  
Institute of Technology

*Designing Software  
Systems that Comply  
with Privacy and Security  
Regulations*

## *2012-13 Distinguished Speaker Series*

The **Department of Computer and Information Sciences** proudly announces a special distinguished speaker series featuring prominent women in computer science.

Topics covered include programming for software defined networks, cloud computing, and privacy and security. An informal question and answer session with the distinguished speaker will follow each lecture.

The series is co-sponsored by the department and the **University of Delaware NSF-ADVANCE** and **PDI STEM** initiatives. It is organized in part by the **CISTers (Women in Computer and Information Sciences)** group and the **WIE (Women in Engineering)** program.

The speaker series is **free and open to the public**.  
For event information, call 302-831-2712.
